DF-151 (REV 07/20)

## A. COBCP Abstract:

San Mateo County Community College District (CCD): Skyline College, Workforce and Economic Development Prosperity Center – \$23,033,000 for the state's share of construction. The project includes the renovation of the Campus Center into a renovated 31,061 assignable square feet (ASF) building, comprised of 4,400 ASF lecture, 8,475 ASF lab, 9,399 ASF office, 3,233 ASF library, 2,166 ASF AV/TV, and 3,388 ASF other support space. Total project costs are estimated at \$47,973,000, including Preliminary Plans \$2,238,000 (\$1,110,000 state, \$1,128,000 district), Working Drawings \$1,308,000 (\$87,000 state, \$1,221,000 district), and Construction \$44,427,000 (\$23,033,000 state, \$21,394,000 district). The construction amount includes \$39,253,000 for the construction contract, \$2,064,000 for contingency, \$737,000 for architectural and engineering services, \$1,103,000 for construction management, and \$1,270,000 for locally funded equipment. The preliminary plans began in July 2019 and were completed in January 2020. The working drawings began in January 2020 and are expected to be approved in July 2021. Construction is scheduled to begin in October 2021 and be completed in April 2023.

## B. Purpose of the Project:

This proposal involves the renovation of the Campus Center to address seismic/structural deficiencies, remove hazardous materials (including flooring that contains asbestos), as well as provide appropriate spaces to meet changing program needs and student support services. The 2020 Budget Act included an appropriation of \$18,123,000 for the construction phase of this project. Subsequently, as part of the DSA's review of the working drawings, this project was identified as needing to comply with current seismic requirements due to the 50% replacement cost trigger per California Administrative Code Section 4-309(c). This prompted the San Mateo County CCD to seek support for the additional \$9,809,000 (\$4,910,000 state; \$4,899,000 district) for the required systematic, comprehensive seismic upgrades to the building's structural and non-structural systems, in lieu of the planned voluntary/partial seismic retrofit. A systematic retrofit includes upgrades to all floor and roof slabs, collector elements, shear walls, grade beams, piles and pile caps along with providing seismic support and bracing for all non-structural systems and components.

Additional information regarding this project can be found in the 2019 proposal, located at <u>https://esd.dof.ca.gov/Documents/bcp/1920/FY1920\_ORG6870\_BCP3075.pdf</u>.
